CurrencyHub

Problem Statement

Create a responsive app for customers to transfer funds between accounts, including multi-currency accounts, with the ability to exchange between GBP, USD, or EUR and exotic currencies as base currency.

CurrencyHub

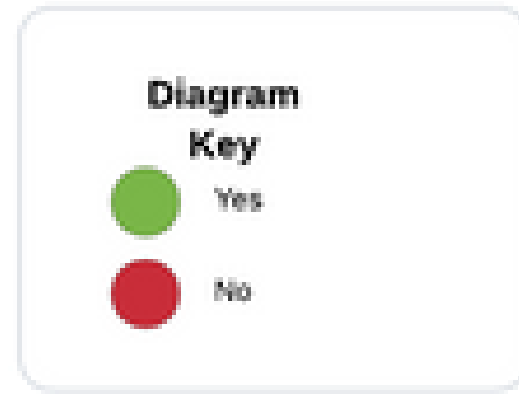

Introducing CurrencyHub

Challenges

- Traditional Banking systems are expensive and often lack transparency when it comes to international money transfers.

Objectives

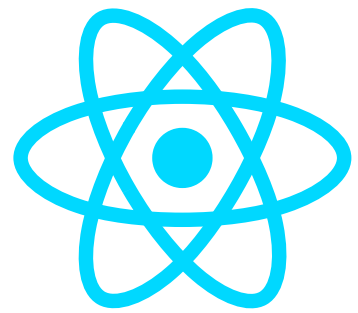

- App offers increased convenience, lower cost and faster transaction times.
- It provides real time exchange rates and secure transactions, ensuring peace of mind of the Customer

Application Flow Diagram

Tools and Technologies

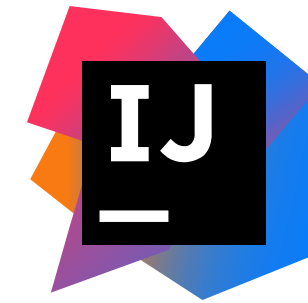

React

Maven

Frontend - React

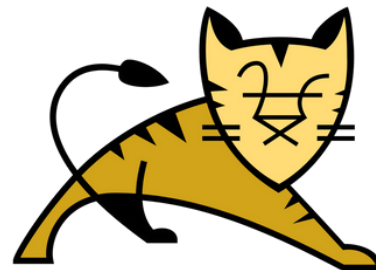

IntelliJ

VSCode

Material UI

Tomcat

Backend-Springboot

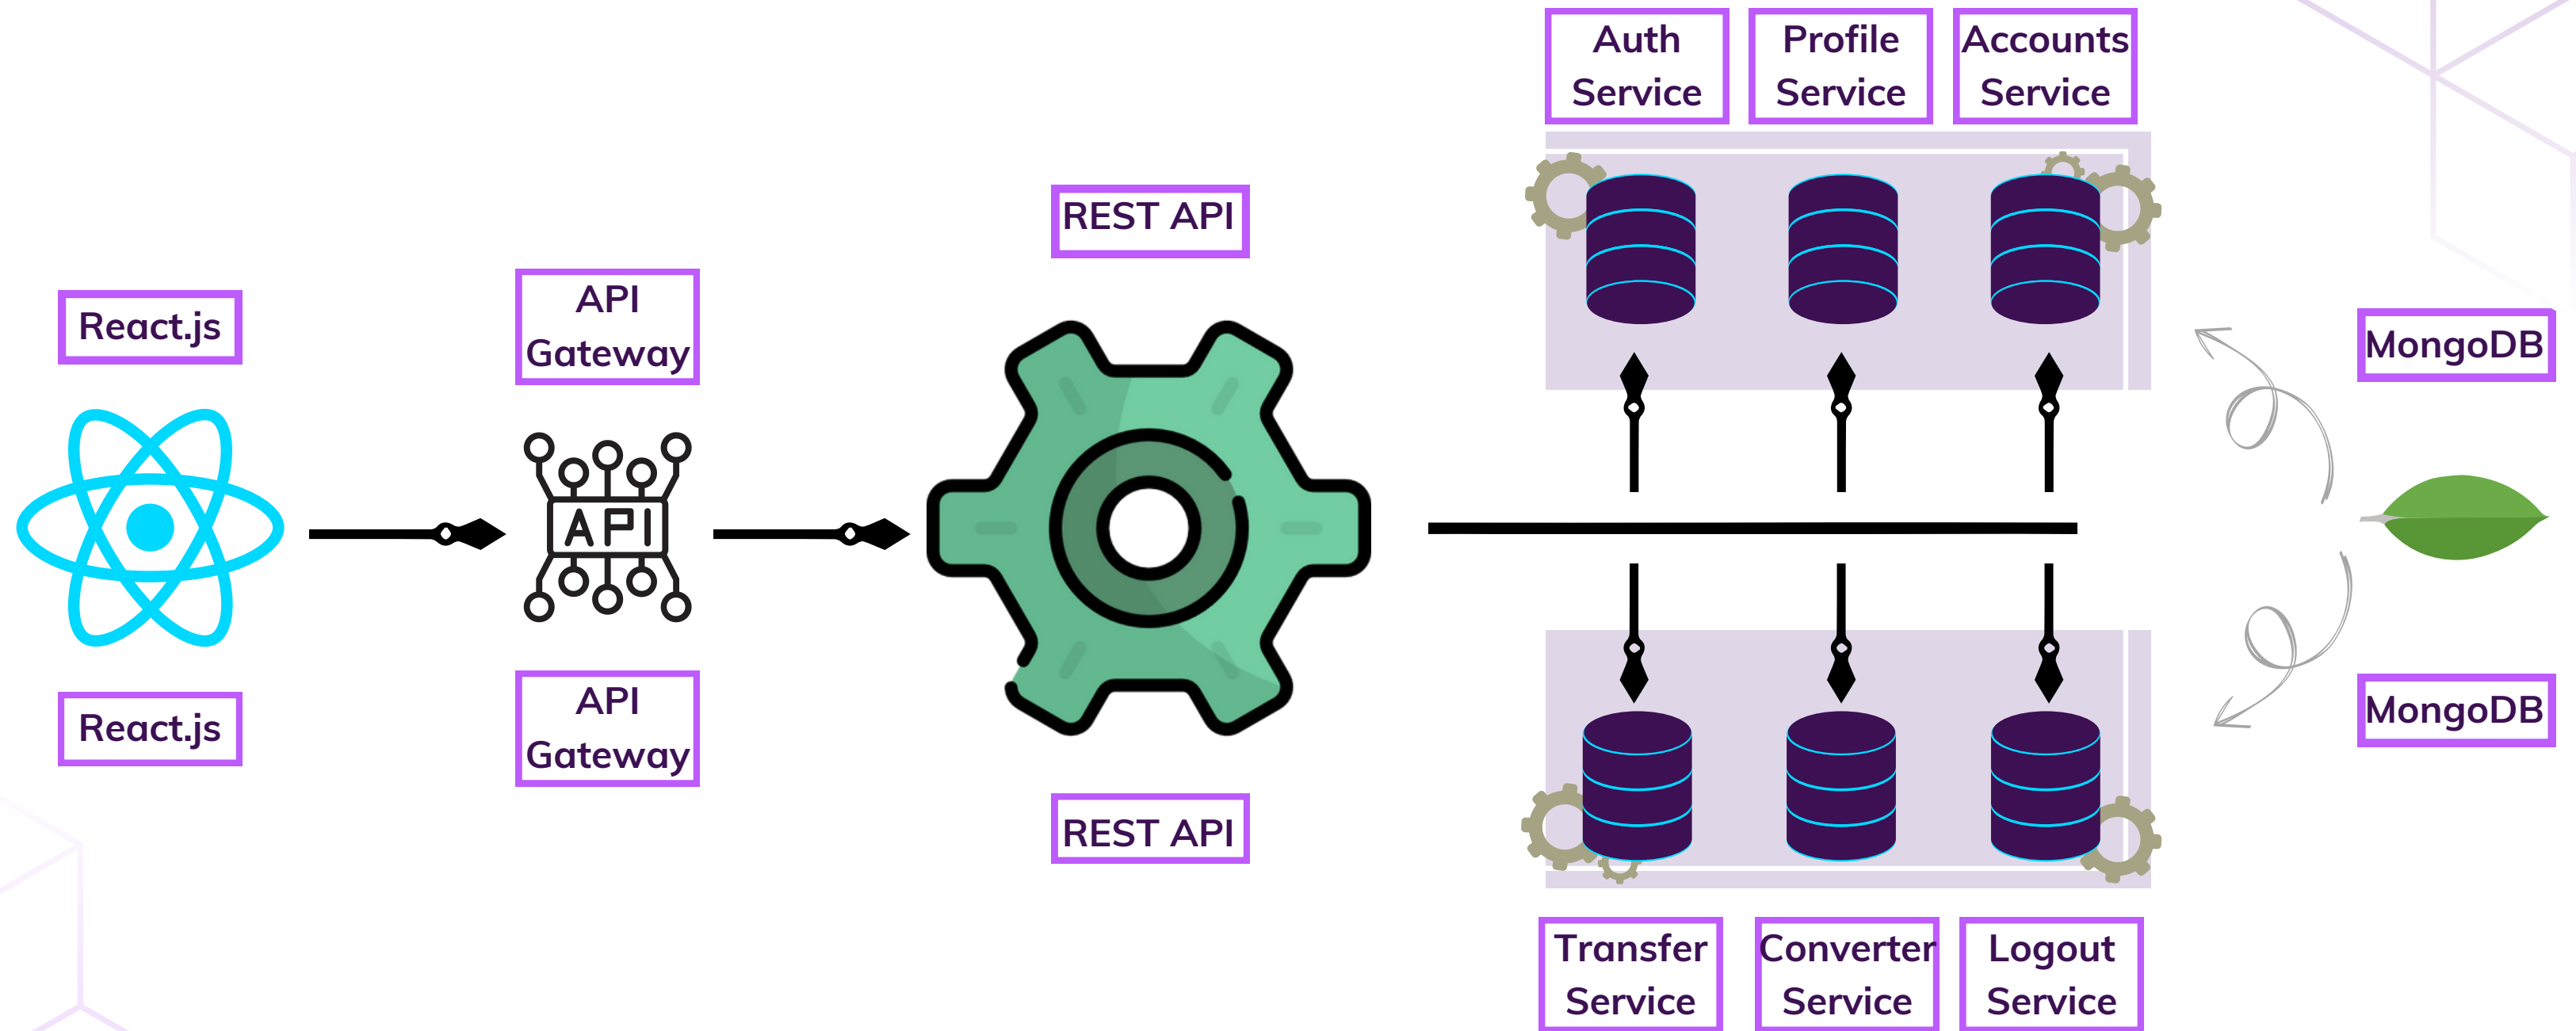

MongoDB

GitLab

Database - MongoDB
